

TOPIC: Coolant for CNC Machining

980ils Products	Randocut 462Z
Applications	Coolant for Copper
Customer /Location	Design E./ Pathum Thani, Thailand
Previous Lube/Fluids	N/A
Materials	Copper
Process/Machines	CNC Machining
Customer Requirements	Quality improvement

Solutions:

1. We recommend Randocut 462Z for copper grinding due to its low foaming properties and good protection against copper discoloration.
2. Randocut 462Z also provides good lubrication and help reduce working temperature during the turning process.

Summary:

- After using Randocut 462Z for two months, the customer reported higher satisfaction, as the product effectively prevent copper discoloration and resolves various stain issues.
