

980Oils®

ISO 9000:2015

CHS-ASIA
CHEMICAL

CHS-ASIA CHEMICAL CO.,LTD.

CHS-Asia Chemical Co., Ltd. was established on September 27, 2011, and has been accredited with the ISO 9001:2015 Quality Management System, covering all aspects of production, sales, and services. Our operations begin with a thorough understanding of customer requirements, gathered by our sales department. Product samples and specifications are reviewed and jointly discussed before being forwarded to our laboratory, where customized formulations are developed to precisely meet customer needs. The approved formulations are then transferred to the production department, where manufacturing is carried out using carefully selected, high-quality base oils imported from leading international sources. Every stage of production is meticulously controlled and undergoes rigorous quality inspections prior to packaging. With every delivery of 980Oils products, our dedicated service team conducts regular quality checks and provides ongoing support to ensure product performance and customer satisfaction.

Vision

The company is committed to conducting business with a strong focus on customer satisfaction in both quality and service, while continuously improving and enhancing operational efficiency.
