

Application Case Study

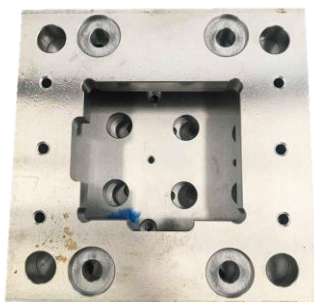

- Product** : Randocut 832A
 : Synthetic Coolant for Grinding and Machining
- Customer** : M - Mould (Samutprakarn – Thailand)
 : Products manufactured – CNC , Mold , Mould base set , Plastic injection

- Application Details** : Application on – Mould Plastic
 : Operation type – Machining , Grinding
 : Material - Steel
 : Concentration - Brix 5-7%
 : Water - Tap water
 : Oil change interval 6 month

Issues & Problems

- Coolant used earlier is expensive and no after sales service.
- The oil is easily deteriorate because it is not taken care.
- No have after sales service.

Result

1. After sales service, take care of coolant for better use.
2. Cost down.
